

Earth Flag Certification for DuPage County Schools Funded by the DuPage County Environmental Committee

**Show that your school is conserving resources
and creating a healthy environment!**

How can your school earn an Earth flag?

Organize a staff training: During a regularly scheduled staff meeting, SCARCE will educate your teachers, administrators, and facilities personnel about recycling, green cleaning, and water and energy conservation. The on-site training is 30-45 minutes long and will get your entire team on the same page. At least 75% of the staff must be present.

Provide a student assembly or school program: SCARCE will engage your students with an exciting program about recycling or energy.

Conduct one waste reduction activity: SCARCE will help you conduct a waste audit, waste-free lunch day, waste audit, school clean-up, or landfill rescue collection.

Implement a comprehensive recycling program: With well-marked containers, make it convenient for staff, students, and visitors to recycle paper, plastic, glass, aluminum, and milk cartons.

Create a power point presentation that documents your actions and your school will receive an Earth Flag at a ceremony!

Contact SCARCE for details.
