

Water Quality Flag Certification for DuPage County Organizations Funded by the DuPage County Stormwater Committee

For organizations that *already have an Earth Flag* and
want to show their commitment to clean water!

How can your organization earn a Water Quality Flag?

Organize a staff training: SCARCE will visit your organization and educate your team about sources of water pollution and ways to manage stormwater.

Install one or more rain barrels

Participate in two activities that improve water quality: Ideas include restoring a natural space using native plants, helping to install stormwater drain markers, or sponsoring a community clean-up event. SCARCE can provide additional suggestions.

Create a power point presentation that documents your actions and your organization will receive a Water Quality Flag at a ceremony!

Contact SCARCE for details.
