

Water Quality Flag Certification for DuPage County Schools

Funded by the DuPage County Stormwater Committee

For schools that *already have an Earth Flag* and want to show their commitment to clean water!

How can your school earn a Water Quality Flag?

Organize a staff training: During a regularly scheduled staff meeting, SCARCE will educate your teachers, administrators, and facilities personnel about sources of water pollution and ways to manage stormwater. The on-site training is 30-45 minutes long.

Provide a student assembly or school program: SCARCE will get your students excited about reducing stormwater runoff and preventing water pollution.

Paint a rain barrel: Students paint a barrel provided by DuPage County.

Participate in two activities that improve water quality: Some ideas are to restore an outdoor space using native plants, help install stormwater drain markers, or sponsor a clean-up event. SCARCE can provide additional suggestions.

Create a power point presentation that documents your actions and your school will receive a Water Quality Flag at a ceremony!

Contact SCARCE for details.
