

DuPage Clean Energy Coalition Meeting

Wednesday, January 22, 2020, 7 to 9 pm

DuPage County Administration Building, Room #3-500B (3rd floor)

421 N. County Farm Road, Wheaton, IL

Featuring: Speaker Mark Frigo of E.ON on energy storage

Don't miss this guest speaker to learn the latest on the hot topic of energy storage. Mark Frigo leads the energy storage business in North America for E.ON, an international energy supplier focused on renewables and energy networks. He has testified before Congress on the role of energy storage in our electricity grid.

The coalition's theme for 2020 is "**energizing community advocacy in DuPage.**" At this meeting we'll launch an exciting new online petition and plan our efforts to engage with school districts, businesses, and churches. To address the climate crisis locally and bring more clean energy to DuPage, we need your help and input!

The DuPage Clean Energy Coalition is a collaboration of residents and organizations working to inform and support a transition to renewable energy sources and smart energy use in DuPage County communities. All are welcome!

*For more details and to RSVP, find us on Facebook at **DuPage Clean Energy Coalition.***
